

E-Business R12 Upgrade Workshop

Truly understanding what it means to upgrade your Oracle E-Business Suite applications to Release 12 can be a confusing and time consuming effort. Most organizations don't have the time needed to research all of the new features and functions that an R12 system has to offer let alone what benefits they could provide. Add in potential licensing, support, hardware, consulting, and other associated costs and the upgrade analysis becomes a project in and of itself.

Upgrading and Implementing Oracle Applications and Technology are what we do every day. Our goal is to develop long-term relationships with our clients that are built on trust and knowledge sharing. We develop many of these partnerships by spending time with our clients to help educate them on the benefits of what Oracle has to offer as well as our experience with other clients.

For organizations that are seriously considering an R12 upgrade, we offer a number of free services that will help them make a decision. Our R12 upgrade workshops are one-half to one-day sessions that provide information based on published data from Oracle, as well as our upgrade experience with other clients. We cover the following topics during each workshop:

- Overview of the new applications, landscape, and architecture
- New and changed features in existing and new R12 EBS modules
- R12 reporting and analytics
- Oracle Fusion Middleware considerations
- Upgrade considerations
- Upgrade benefits
- Lessons learned

The half-day offering is designed as an overview for leadership and management and can be delivered at your site or via a web presentation. The full-day session includes the overview plus functional area breakouts in areas such as Financials, Procurement, Human Capital Management, and Technical. These breakouts provide a forum for users, analysts, and technologists to delve deeper into new features that may add value or help to alleviate current issues and challenges.

We are also open to modifying the agenda to address only specific areas or to include other topics that are related to R12 upgrades such as cloud computing, Fusion applications, and utilizing CedarCrestone's R12 Upgrade Lab services.

For more information about the E-Business R12 Upgrade Workshop, please contact a CedarCrestone professional at EBSWorkshop@CedarCrestone.com.

Let CedarCrestone help you to make an informed decision:

- Should you upgrade to E-Business Suite Release 12 or stay on your current version?
- What will it cost to upgrade?
- What benefits will you achieve with an upgrade?
- What are the risks?
- What will happen to your Oracle support?
- Are there other reasons to upgrade?
- What about Fusion Applications?
